

### Features

- $\pm 15V$  Wide Analog Signal Range
- Low "ON" Resistance  $25\Omega$  (Typical)
- High Current Capability 80mA (Typical)
- Break-Before-Make Switching
  - Turn-On Time 370ns (Typical)
  - Turn-Off Time 280ns (Typical)
- No Latch-Up
- Input MOS Gates are Protected from Electrostatic Discharge
- DTL, TTL, CMOS, PMOS Compatible

### Applications

- High Frequency Switching
- Sample and Hold
- Digital Filters
- Operational Amplifier Gain Switching

### Description

This family of CMOS analog switches offers low resistance switching performance for analog voltages up to the supply rails and for signal currents up to 80mA. "ON" resistance is low and stays reasonably constant over the full range of operating signal voltage and current.  $R_{ON}$  remains exceptionally constant for input voltages between +5V and -5V and currents up to 50mA. Switch impedance also changes very little over temperature, particularly between  $0^{\circ}C$  and  $+75^{\circ}C$ .  $R_{ON}$  is nominally  $25\Omega$  for HI-5048 through HI-5051 and HI-5046A and HI-5047A and  $50\Omega$  for HI-5040 through HI-5047.

All devices provide break-before-make switching and are TTL and CMOS compatible for maximum application versatility. Performance is further enhanced by Dielectric Isolation processing which insures latch-free operation with very low input and output leakage currents ( $0.8nA$  at  $+25^{\circ}C$ ). This family of switches also features very low power operation ( $1.5mW$  at  $+25^{\circ}C$ ).

There are 14 devices in this switch series which are differentiated by type of switch action and value of  $R_{ON}$  (see Functional Description). All devices are available in 16 lead DIP packages. The HI-5040 and HI-5050 switches can directly replace IH-5040 series devices except IH5048, and are functionally compatible with the DG180 and DG190 family. Each switch type is available in the  $-55^{\circ}C$  to  $+125^{\circ}C$  and  $0^{\circ}C$  to  $+75^{\circ}C$  performance grades.

### Functional Description

PART NUMBER	TYPE	$R_{ON}$
HI-5040	SPST	$50\Omega$
HI-5041	Dual SPST	$50\Omega$
HI-5042	SPDT	$50\Omega$
HI-5043	Dual SPDT	$50\Omega$
HI-5044	DPST	$50\Omega$
HI-5045	Dual DPST	$50\Omega$
HI-5046	DPDT	$50\Omega$
HI-5046A	DPDT	$25\Omega$
HI-5047	4PST	$50\Omega$
HI-5047A	4PST	$25\Omega$
HI-5048	Dual SPST	$25\Omega$
HI-5049	Dual DPST	$25\Omega$
HI-5050	SPDT	$25\Omega$
HI-5051	Dual SPDT	$25\Omega$
