- Typical insertion loss < 0.2 dB to 2.3 GHz
- Typical directivity > 23 dB
- Small outline SC-88 (6 Lead SC-70)
- Built-in temperature compensating diode
- Low cost for high-volume handset applications
- Available lead (Pb)-free MSL-2 @ 250 °C per JEDEC J-STD-020

Description

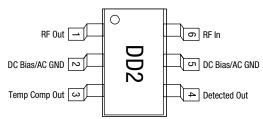

The DD02-92 directional detector is an alternative to the DD01-92 with improved insertion loss and directivity with slightly lower sensitivity. It is designed for handset power monitor applications from 800 MHz to 3 GHz. It is packaged in the small footprint, SC-88 (6 lead SC-70) package. The DD02-92 incorporates a directional coupler and two GaAs Schottky diodes on a monolithic GaAs chip. By applying forward DC bias to both Schottky diodes, the DD02-92 may be conveniently temperature compensated. The DD02-92 is characterized from 500 MHz to 3 GHz and generates a detected signal at 1.8 GHz of approximately 190 mV at 10 mW input power. Each Schottky diode is forward biased to approximately 5 µA.

Skyworks offers lead (Pb)-free "environmentally friendly" packaging that is RoHS compliant (European Parliament for the Restriction of Hazardous Substances).

Conditions: 10 dBm input power, 1 V applied to Pin 2 and 5 (See test circuit). All data was taken with RLOAD = 100 k\Omega.

Detected output voltage is the difference between $\mathsf{V}_{\mathsf{REF}}$ and $\mathsf{V}_{\mathsf{DET}}.$ A digital voltmeter was used as a differential amplifier.

Performance is guaranteed only under the conditions listed in the specifications table and is not guaranteed under the full range(s) described by the Absolute Maximum specifications. Exceeding any of the absolute maximum/minimum specifications may result in permanent damage to the device and will void the warranty.

CAUTION: Although this device is designed to be as robust as possible, Electrostatic Discharge (ESD) can damage this device. This device must be protected at all times from ESD. Static charges may easily produce potentials of several kilovolts on the human body or equipment, which can discharge without detection. Industry-standard ESD precautions must be employed at all times.
