

April 1988 Revised July 1999

74F157A Quad 2-Input Multiplexer

General Description

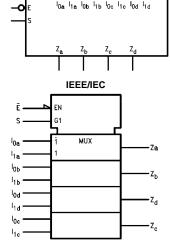

The F157A is a high-speed quad 2-input multiplexer. Four bits of data from two sources can be selected using the common Select and Enable inputs. The four outputs present the selected data in the true (non-inverted) form. The F157A can also be used to generate any four of the 16 different functions to two variables.

Ordering Code:

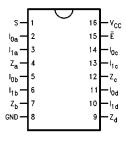

| Order Number | Package Number | Package Description | | | | | |
|--------------|----------------|---|--|--|--|--|--|
| 74F157ASC | M16A | 16-Lead Small Outline Integrated Circuit (SOIC), JEDEC MS-012, 0.150 Narrow | | | | | |
| 74F157ASJ | M16D | 16-Lead Small Outline Package (SOP), EIAJ TYPE II, 5.3mm Wide | | | | | |
| 74F157APC | N16E | 16-Lead Plastic Dual-In-Line Package (PDIP), JEDEC MS-001, 0.300 Wide | | | | | |

Devices also available in Tape and Reel. Specify by appending the suffix letter "X" to the ordering code.

H = HIGH Voltage Level

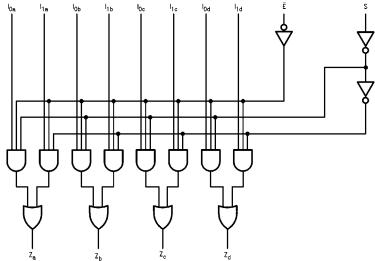

Functional Description

The F157A is a quad 2-input multiplexer. It selects four bits of data from two sources under the control of a common Select input (S). The Enable input (\overline{E}) is active LOW. When \overline{E} is HIGH, all of the outputs (Z) are forced LOW regardless of all other inputs. The F157A is the logic implementation of a 4-pole, 2-position switch where the position of the switch is determined by the logic levels supplied to the Select input. The logic equations for the outputs are shown below:

$$Z_n = \overline{E} \bullet (I_{1n}S + I_{0n} \overline{S})$$

A common use of the F157A is the moving of data from two groups of registers to four common output busses. The particular register from which the data comes is determined by the state of the Select input. A less obvious use is as a function generator. The F157A can generate any four of the 16 different functions of two variables with one variable common. This is useful for implementing highly irregular logic.

Absolute Maximum Ratings(Note 1)

 $_{-65^{\circ}\text{C to}}$ $_{+150^{\circ}\text{C}}$ Conditions

 $\begin{array}{ll} \mbox{Storage Temperature} & -65\mbox{°C to } +150\mbox{°C} \\ \mbox{Ambient Temperature under Bias} & -55\mbox{°C to } +125\mbox{°C} \\ \end{array}$

Junction Temperature under Bias -55°C to +150°C

 $\begin{array}{lll} \text{V}_{\text{CC}} \text{ Pin Potential to Ground Pin} & -0.5 \text{V to } +7.0 \text{V} \\ \text{Input Voltage (Note 2)} & -0.5 \text{V to } +7.0 \text{V} \\ \text{Input Current (Note 2)} & -30 \text{ mA to } +5.0 \text{ mA} \\ \end{array}$

Voltage Applied to Output in HIGH State (with $V_{CC} = 0V$)

 $\begin{array}{ll} \mbox{Standard Output} & -0.5\mbox{V to V}_{\mbox{CC}} \\ \mbox{3-STATE Output} & -0.5\mbox{V to +5.5\mbox{V}} \end{array}$

Current Applied to Output

 $\label{eq:local_local_local} \mbox{in LOW State (Max)} \qquad \mbox{twice the rated I_{OL} (mA)} \\ \mbox{ESD Last Passing Voltage (Min)} \qquad \mbox{4000V}$

Free Air Ambient Temperature 0° C to $+70^{\circ}$ C Supply Voltage +4.5V to +5.5V

Recommended Operating

Note 1: Absolute maximum ratings are values beyond which the device may be damaged or have its useful life impaired. Functional operation under these conditions is not implied.

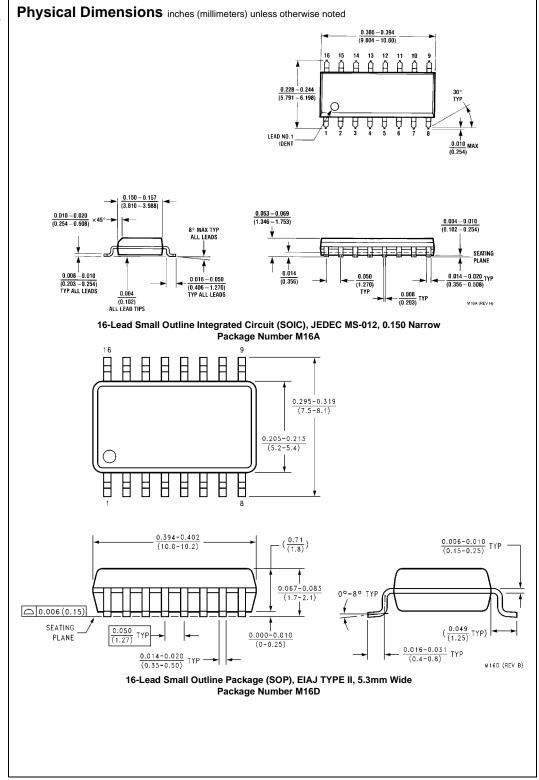

Note 2: Either voltage limit or current limit is sufficient to protect inputs.

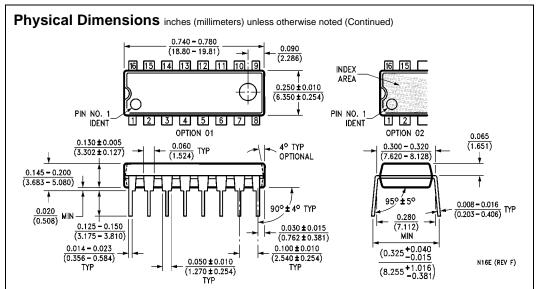

DC Electrical Characteristics

LIFE SUPPORT POLICY

FAIRCHILD'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF THE PRESIDENT OF FAIRCHILD SEMICONDUCTOR CORPORATION. As used herein:

- Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body, or (b) support or sustain life, and (c) whose failure to perform when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury to the user.
- A critical component in any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.
