

Features

- Inputs: 28 Vdc per MIL-STD-704D/E/F 155 Vdc per MIL-STD-1399A 270 Vdc per MIL-STD-704D/E/F
- Single output: 2 48 Vdc
- Up to 23 W/in³
- MIL-STD-810 environments
- Up to 90% efficiency
- Remote sense
- Current limit
- ZCS power architecture
- Low noise FM control
- Size: 2.28" x 2.4" x 0.5" (57,9 x 61,0 x 12,7 mm)

Product Highlights

The MI-J00 family of DC-DC converters is designed for applications utilizing distributed power architectures. Based on Vicor's VI-200 / VI-J00 family of zero-current switching, component-level DC-DC converters, the MI-J00 family offers exceptional performance in terms of power density, efficiency, noise, ease of use, and reliability.

The MI-J00 family meets all steady-state, transient and under/overvoltage requirements of MIL-STD-704D/E/F for both 28 Vdc input (MI-J2X) and 270 Vdc input (MI-J6X), and the worst case envelope of MIL-STD-1399A for 155 Vdc input (MI-J5X).

The output voltage can be externally trimmed or programmed from 50% to 110% of nominal output. Current limiting, remote sense, and an inhibit pin all combine to offer a high degree of protection, versatility, and reliability for power systems.

Fully encapsulated in Vicor's industry standard package, the MI-J00 family meets MIL-STD-810 environmental testing requirements for humidity, fungus, salt-fog, explosive atmosphere, acceleration, vibration, and shock.

Packaging Options

Standard: Slotted baseplate

SlimMod: Flangeless baseplate, option suffix: - S Example: MI - JXX - XX - S

FinMod: Finned heat sink, option suffix:
- F1, -F2, -F3 and - F4

Examples: MI - JXX - XX -F1, 0.25" fins, longitudinal MI - JXX - XX -F2, 0.50" fins, longitudinal MI - JXX - XX -F3, 0.25" fins, transverse MI - JXX - XX -F4, 0.50" fins, transverse Data Sheet *MI-J00* DC-DC Converters 10 to 50 Watts

CONVERTER SPECIFICATIONS

(typical at $T_{BP} = 25^{\circ}$ C, nominal line and 75% load, unless otherwise specified)

■ INPUT SPECIFICATIONS

Parameter	Min	Тур	Max	Units	Test Conditions
Inrush charge		60 x 10 ⁻⁶	100 x 10 ⁻⁶	Coulombs	Nominal line
Input reflected ripple current – pp		10%		lin	Nominal line, full load
Input ripple rejection		$30+20 \text{ Log}\left(\frac{\text{Vin}}{\text{Vout}}\right)$		dB	120 Hz, nominal line
Input ripple rejection		$20 + 20 \text{Log}\left(\frac{\text{Vin}}{\text{Vout}}\right)$		dB	2400 Hz, nominal line
No load power dissipation		1.35	2	Watts	

OUTPUT CHARACTERISTICS

Parameter	Min	Тур	Мах	Units	Test Conditions
Setpoint accuracy		0.5	1	%Vnom	
		0.05	0.2	%Vnom	LL to HL, 10% to Full Load
Load/line regulation		0.2	0.5	%V _{NOM}	LL to HL, No Load to 10%
Output temperature drift		0.01	0.02	% / °C	Over rated temperature
Long term drift		0.02		%/1K hours	
		100	150	mV	Whichever is greater
Output ripple – pp		1.0	1.5	%Vnom	20 MHz bandwidth
Trim range [a]	50		110	%Vnom	
Total remote sense compensation	0.5			Volts	
Current limit	105		125	%Ілом	Automatic restart
Short circuit current	105		130	%Ілом	

^[a] 10 V, 12 V and 15 V outputs, standard trim range ±10%. Consult factory for wider trim range.

CONTROL PIN SPECIFICATIONS

Parameter	Min	Тур	Max	Units	Test Conditions
Gate out impedance		50		Ω	
Gate in impedance		1000		Ω	
Gate in high threshold			6	Volts	Use open collector
Gate in low threshold	0.65			Volts	
Gate in low current			6	mA

Warranty

Vicor products are guaranteed for two years from date of shipment against defects in material or workmanship when in normal use and service. This warranty does not extend to products subjected to misuse, accident, or improper application or maintenance. Vicor shall not be liable for collateral or consequential damage. This warranty is extended to the original purchaser only.

EXCEPT FOR THE FOREGOING EXPRESS WARRANTY, VICOR MAKES NO WARRANTY, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

Vicor will repair or replace defective products in accordance with its own best judgement. For service under this warranty, the buyer must contact Vicor to obtain a Return Material Authorization (RMA) number and shipping instructions. Products returned without prior authorization will be returned to the buyer. The buyer will pay all charges incurred in returning the product to the factory. Vicor will pay all reshipment charges if the product was defective within the terms of this warranty.

Information published by Vicor has been carefully checked and is believed to be accurate; however, no responsibility is assumed for inaccuracies. Vicor reserves the right to make changes to any products without further notice to improve reliability, function, or design. Vicor does not assume any liability arising out of the application or use of any product or circuit; neither does it convey any license under its patent rights nor the rights of others. Vicor general policy does not recommend the use of its components in life support applications wherein a failure or malfunction may directly threaten life or injury. Per Vicor Terms and Conditions of Sale, the user of Vicor components in life support applications assumes all risks of such use and indemnifies Vicor against all damages.

Vicor s comprehensive line of power solutions includes high density AC-DC and DC-DC modules and accessory components, fully configurable AC-DC and DC-DC power supplies, and complete custom power systems.

Information furnished by Vicor is believed to be accurate and reliable. However, no responsibility is assumed by Vicor for its use. Vicor components are not designed to be used in applications, such as life support systems, wherein a failure or malfunction could result in injury or death. All sales are subject to Vicor's Terms and Conditions of Sale, which are available upon request.

Specifications are subject to change without notice.

Intellectual Property Notice

Vicor and its subsidiaries own Intellectual Property (including issued U.S. and Foreign Patents and pending patent applications) relating to the products described in this data sheet. Interested parties should contact Vicor's Intellectual Property Department.
