Product Specification
Impul-Mate Connector

1. Scope :

1.1 Contents :

This specification covers the requirements for product performance, test methods and quality assurance provisions of Impul-Mate Connector.

Applicable product description and part numbers are as shown in Appendix 1.

2. Applicable Documents :

The following documents form a part of this specification to the extent specified herein. In the event of conflict between the requirements of this specification and the product drawing, the product drawing shall take precedence. In the event of conflict between the requirements of this specification and the referenced documents, this specification shall take precedence.

2.1 AMP Specifications :

- A. 109-5000 Test Specification, General Requirements for Test Methods
- B. 114-5159, 5160 Application Specification, Crimping 040/070 Tab and Receptacle Contacts.
- C. 501- 5132 Test Report :

3. Requirements :

3.1 Design and Construction :

Product shall be of the design, construction and physical dimensions specified in the applicable product drawing.

3.2 Materials :

A. Contact :

a. Tab Contact : Pre-tinned Brass, or plain Brass strip with Selective Gold-Plating over Nickel Underplate all over.

b. Receptacle Contact : Pre-tinned Brass or Pre-tinned phosphor bronze, or plain brass with selective Gold plating over nickel underplating or plain phosphor bronze with selective gold plating over nickel under plating.

B. Housing :

a. Plug Housing PBT

b. Cap Housing PBT

c. Double Lock Plate PBT

d. Tine Plate PBT

C. Others :

a. Wire Cover PP

b. M6 Bolt Carbon Steel

c. Bolt Case PBT

d. Indicator Pin PBT

e. Bolt Stopper Plate : Stainless Steel

f. Nut : Carbon Steel

3.3 Ratings :

A. Voltage Rating : 13 VAC

B. Current Rating : .040 1A, .070 5A, allowable current to be applied.

C. Temperature Rating : -30 °C to 105 °C

3.4 Performance and Test Descriptions :

The product shall be designed to meet the electrical, mechanical and environmental performance requirements specified in Fig. 2. All tests shall be performed in the room temperature, unless otherwise specified.

3.5 Test Requirements and Procedures Summary :

Para.	Test Items	Requirements	Procedures
3.5.1	Confirmation of Product	Product shall be conforming to the requirements of applicable product drawing and Application Specification .	Visually, dimensionally and functionally inspected per applicable quality inspection plan.
Electrical Requirements			
3.5.2	Termination Resistance (Low Level)	.040 10 m Ω Max. (Initial) 20 m Ω Max (Final) .070 3 m Ω Max (Initial) 10 m Ω Max (Final)	Subject mated contacts assembled in housing to closed circuit current of 10 mA Max. at open circuit voltage of 20 mV Max. Fig. 3. AMP Spec. 109-5311-1
3.5.3	Dielectric Strength	No creeping discharge nor flashover shall occur. Current leakage : ___ mA Max.	1 kVAC for 1 minute. Test between adjacent circuits of mated connectors.
3.5.4	Insulation Resistance	.040 .070 100 M Ω Min.	Impressed voltage 500 V DC. Test between adjacent circuits of mated connectors. Fig. 4
3.5.5	Current Leakage	10 μ A (Initial) 1 mA Max. (Final)	13 V DC impressed. After exposure in test chamber in 60 \pm 5 $^{\circ}$ C, 90~95% RH. for 1 hour, measure current leakage.
