For details on electrical specifications contact Hamlin Contact rating-Product of the switching voltage and current should never exceed the wattage rating. Contact Hamlin for additional load/life information Operate (inc. bounce / Release Time-per Eia/NARM R5421A, diode suppressed coil. Pull in Range-Contact Hamlin for tolerances within this range. Rating Sensitivity, The value at which contact ratings and operating characteristics are determined. Derating may be required for lower values Storage Temperature-Long time exposure at elevated temperature may degrade solderability of the leads.
