

# Safety Limit Switch

## D4B-□□□N

CSM\_D4B\_N\_DS\_E\_3\_1

**Snap-action contact with certified direct opening operation certification** .

**Maintenance, seal, and resistance to shock increased and direct opening mechanism added.**

**Three-conduit switches and 2NC switches are also available.**

**Note:** Contact your sales representative for details on models with safety standard certification.

- Direct opening mechanism (NC contacts only) added to enable opening contacts when faults occur, such as fused contacts.
- Safety of lever settings ensured using a mechanism that engages a gear between the operating position indicator plate and the lever.
- Equipped with a mechanism that indicates the applicable operating zone, as well as push-button switching to control left and right motion.
- Head seal structure strengthened to improve seal properties (TÜV: IEC IP67, UL: NEMA 3, 4, 4X, 6P, and 13).
- Wide standard operating temperature range: –40 to 80°C (standard type).
- Models with gold-plated contacts added to the series to enable handling microloads.
- Certified standards: UL, CSA, EN (TÜV), and CCC.

 Be sure to read the "Safety Precautions" on page 14 and the "Precautions for All Safety Limit Switches".

  - The above values may vary depending on the model. Consult your OMRON sales representative for details.
- \*1. The degree of protection is tested using the method specified by the standard (EN60947-5-1). Confirm that sealing properties are sufficient for the operating conditions and environment beforehand.
- \*2. The durability is for an ambient temperature of 5 to 35°C and ambient humidity of 40% to 70%. For further conditions, consult your OMRON sales representative.
- \*3. -20 to 80°C for the flexible-rod type.

# Engineering Data

## Electrical Durability (Snap-action)

(Ambient temperature: 5 to 30°C, ambient humidity: 40 to 70%)

## Structure and Nomenclature

### Structure

The roller lever switch employs a system which allows selection of operation on only one side (left or right) or both sides without the use of any tools.

**Seal Ring**  
Sealing properties improved by using a X ring and bearing-free structure.

**Conduit Opening**  
Models are available with a wide range of conduits.

Size	Box	1-conduit model	2-conduit model
Pg13.5		Yes	Yes
G1/2		Yes	Yes
1/2-14NPT		Yes	Yes

Note: NBR is used for rubber parts.

## Direct Opening Mechanism 1NO/1NC Contact (Snap-action)

Conforms to EN60947-5-1 Direct Opening (→) (Only NC contact has a direct opening mechanism.)

## 1NC/1NO Contact (Slow-action)

Conforms to EN60947-5-1 Direct Opening (→) (Only NC contact has a direct opening mechanism.)  
When contact welding occurs, the contacts are separated from each other by the plunger being pushed in.

## 2NC Contact (Slow-action)

Conforms to EN60947-5-1 Direct Opening (→) (Both NC contacts have a direct opening mechanism.)  
When contact welding occurs, the contacts are separated from each other by the plunger being pushed in.

## Contact Form

Model	Contact	Contact form	Diagrams	Explanation

**Note:** Terminal numbers are according to EN50013; contact symbols are according to IEC60947-5-1.

# Dimensions and Operating Characteristics

(Unit: mm)

**Note:** Omitted dimensions are the same as those for the Roller Lever Type Models  
 D4B-1□□□□N and D4B-5□□□□N have a PG13.5 conduit opening. D4B-2□□□□N and D4B-6□□□□N have a G1/2 conduit

opening.  
 D4B-3□□□□N and D4B-7□□□□N have a 1/2-14NPT conduit opening.

- Note:** 1. Unless otherwise specified, a tolerance of  $\pm 0.4$  mm applies to all dimensions.  
 2. Safety Limit Switch specifications are satisfied with D4B-□□□□N Levers only (example: D4B-0001N).  
 The D4B-0006N Adjustable Roller Lever and D4B-0007N Adjustable Rod Lever, however, cannot be used. Do not order them for a Side Rotary Operating Head.

## Application Precaution

### Changing the Operating Direction Switches with Roller Levers

The operating direction of the lever can be easily changed without using any tools. It can be set to clockwise operation (CW) or counterclockwise (CCW) operation.

Use the procedure given at the right to change the operating direction.

Operating section (on back of Head)	Operating procedure
	<ol style="list-style-type: none"> <li>1. Remove the four Head set screws and remove the Head from the Switch Box.</li> <li>2. Turn the bottom of the Head toward you, press in the Head Cover shown in the diagram at the left, and turn the Cover clockwise or counterclockwise.</li> </ol> <p><b>Note:</b> The factory setting is for "CW.CCW."</p>
	<ol style="list-style-type: none"> <li>3. The "CW" setting is for clockwise operation and the "CCW" setting is for counterclockwise operation. Set the Cover to the desired position.</li> </ol>

## Safety Precautions

Refer to the "Precautions for All Switches" and "Precautions for All Safety Limit Switches".

### Precautions for Safe Use

- Do not use the Switch submerged in oil or water, or in locations continuously subject to splashes of oil or water. Doing so may result in oil or water entering the Switch interior. (The IP67 degree of protection specification for the Switch refers to water penetration while the Switch is submersed in water for a specified period of time.)
- Always attach the cover after completing wiring and before using the Switch. Also, do not turn ON the Switch with the cover open. Doing so may result in electric shock.

### Precautions for Correct Use

#### Appropriate Tightening Torque

Be sure to tighten each screw of the D4B-□N properly, otherwise the D4B-□N may malfunction.

Type	Appropriate tightening torque
1 M3.5 terminal screw	0.59 to 0.78 N·m
2 Cover mounting screw *	1.18 to 1.37 N·m
3 Head mounting screw	0.78 to 0.88 N·m
4 M5 body mounting screw	4.90 to 5.88 N·m
5 Connector	1.77 to 2.16 N·m
6 Lever Mounting Screws (Roller Levers)	4.90 to 5.88 N·m
--- Cap screw (for three-conduit models)	1.27 to 1.67 N·m

\* Apply a tightening torque of 0.78 to 0.88 N·m to three-conduit models.

### Mounting

Use four M5 screws with washers to mount the standard model. Be sure to apply the proper torque to tighten each screw. The 3-conduit models can be mounted more securely by using the four screws plus two 5<sup>-0.05</sup>/<sub>-0.15</sub> mm diameter studs, each of which has a maximum height of 4.8 mm as shown below.

### Mounting Dimensions (M5)

### Changes in Actuator Mounting Position

- To change the angle of the lever, loosen the Allen-head bolts on the side of the lever.
- The operating position indicator plate has protruding parts which engage with the lever, thus allowing changes to the lever position by 90°.
- The back of the operating position indicator plate has no protruding parts. If this plate is turned over and attached, any angle within a 360° range can be set. Do not turn over the plate, however, when using the D4B-□N as a switch with a certified direct opening mechanism. For an SUVA- or BIA-certified application, make sure that the lever engages with the operating position indicator plate securely so that the lever will not slip.

### Changes in Head Mounting Position

By removing the screws on the four corners of the head, the head can be reset in any of four directions. Make sure that no foreign materials will penetrate through the head.

### Wiring

Do not connect the bare lead wires directly to the terminals but be sure to connect each of them by using an insulation tube and M3.5 round crimp terminals and tighten each terminal screw within the specified torque range.  
The proper lead wire is 20 to 14 AWG (0.5 to 2.5 mm<sup>2</sup>) in size.

Make sure that all crimp terminals come into contact with the casing or cover as shown below, otherwise the cover may not be mounted properly or the D4B-□N may malfunction.

### Conduit Opening

- Make sure that each connector is tightened within the specified torque range.  
The casing may be damaged if the connector is tightened excessively.
- If the 1/2-14NPT is used, cover the cable and conduit end with sealing tape in order to ensure IP67.
- The Pg13.5 connector must be Nippon Flex's ABS-08 Pg13.5 or ABS-12 Pg13.5.
- Use an OMRON SC-series Connector (sold separately) that is suited to the cable in diameter.
- Properly attach the provided conduit cap to the unused conduit opening and securely tighten the cap screw within the specified torque when wiring the D4B-□N.

### Others

- The load for the actuator (roller) of the Switch must be imposed on the actuator in the horizontal direction, otherwise the actuator or the rotating axis may be deformed or damaged.

- When using a long lever model like the D4B-□□16N or D4B-□□17N, the Switch may telegraph. To avoid telegraphing, take the following precautions.

- Set the lever to operate in one direction.
- Modify the rear end of the dog to an angle of 15° to 30° as shown below or to a secondary-degree curve.

- Modify the circuit so as not to detect the wrong operating signals.

### Ordering Method

The D4B-□N uses a block mounting method. Switches can be ordered either as sets or as individual parts. If a set is ordered, the Switch will be shipped with all parts assembled.

**Note:** For Switches with Roller Levers, do not order just the Head and Lever, or just the Switch Box and Lever.

## Read and Understand This Catalog

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

## Warranty and Limitations of Liability

### WARRANTY

OMRON's exclusive warranty is that the products are free from defects in materials and workmanship for a period of one year (or other period if specified) from date of sale by OMRON.

OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, REGARDING NON-INFRINGEMENT, MERCHANTABILITY, OR FITNESS FOR PARTICULAR PURPOSE OF THE PRODUCTS. ANY BUYER OR USER ACKNOWLEDGES THAT THE BUYER OR USER ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE. OMRON DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED.

### LIMITATIONS OF LIABILITY

OMRON SHALL NOT BE RESPONSIBLE FOR SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED ON CONTRACT, WARRANTY, NEGLIGENCE, OR STRICT LIABILITY.

In no event shall the responsibility of OMRON for any act exceed the individual price of the product on which liability is asserted.

IN NO EVENT SHALL OMRON BE RESPONSIBLE FOR WARRANTY, REPAIR, OR OTHER CLAIMS REGARDING THE PRODUCTS UNLESS OMRON'S ANALYSIS CONFIRMS THAT THE PRODUCTS WERE PROPERLY HANDLED, STORED, INSTALLED, AND MAINTAINED AND NOT SUBJECT TO CONTAMINATION, ABUSE, MISUSE, OR INAPPROPRIATE MODIFICATION OR REPAIR.

## Application Considerations

### SUITABILITY FOR USE

OMRON shall not be responsible for conformity with any standards, codes, or regulations that apply to the combination of products in the customer's application or use of the products.

At the customer's request, OMRON will provide applicable third party certification documents identifying ratings and limitations of use that apply to the products. This information by itself is not sufficient for a complete determination of the suitability of the products in combination with the end product, machine, system, or other application or use.

The following are some examples of applications for which particular attention must be given. This is not intended to be an exhaustive list of all possible uses of the products, nor is it intended to imply that the uses listed may be suitable for the products:

- Outdoor use, uses involving potential chemical contamination or electrical interference, or conditions or uses not described in this catalog.
- Nuclear energy control systems, combustion systems, railroad systems, aviation systems, medical equipment, amusement machines, vehicles, safety equipment, and installations subject to separate industry or government regulations.
- Systems, machines, and equipment that could present a risk to life or property.

Please know and observe all prohibitions of use applicable to the products.

NEVER USE THE PRODUCTS FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCTS ARE PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

### PROGRAMMABLE PRODUCTS

OMRON shall not be responsible for the user's programming of a programmable product, or any consequence thereof.

## Disclaimers

### CHANGE IN SPECIFICATIONS

Product specifications and accessories may be changed at any time based on improvements and other reasons.

It is our practice to change model numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the products may be changed without any notice. When in doubt, special model numbers may be assigned to fix or establish key specifications for your application on your request. Please consult with your OMRON representative at any time to confirm actual specifications of purchased products.

### DIMENSIONS AND WEIGHTS

Dimensions and weights are nominal and are not to be used for manufacturing purposes, even when tolerances are shown.

### PERFORMANCE DATA

Performance data given in this catalog is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of OMRON's test conditions, and the users must correlate it to actual application requirements. Actual performance is subject to the OMRON Warranty and Limitations of Liability.

### ERRORS AND OMISSIONS

The information in this document has been carefully checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical, or proofreading errors, or omissions.
