elmeg CS300 / elmeg CS310

ISDN System Telephony – from Professionals for Professionals!

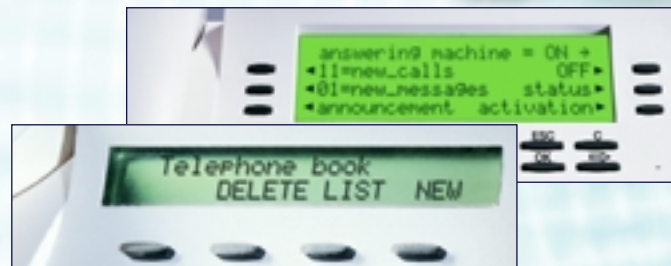

The new ISDN system phones elmeg CS300 and elmeg CS310 – successors to the multiple award-winning elmeg CS100 – are setting new standards in ISDN telephony. The well thought through and tried and tested convenience functions make these system phones the first choice for ISDN system phones. Combined with elmeg ISDN PABX systems*, the elmeg CS300 and elmeg CS310 offer you the most advanced and powerful system phones available with optimal transparency and simple operation.

System Philosophy

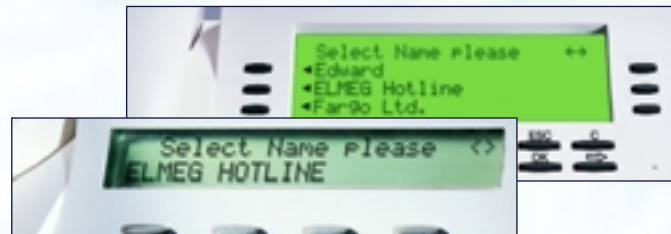

Optimally matched to ISDN PABX systems of the C family*, the elmeg CS300 and elmeg CS310 offer a variety of convenient functions that you can assign to programmable keys to meet your specific needs. Each key also has its own LED which indicates whether the assigned function is currently active. The new elmeg DECT100, a mobile terminal device, offers you even more convenience and flexibility. A special follow-me function ensures that all calls placed to the elmeg CS300 or elmeg CS310 are automatically rerouted to the DECT mobile unit as soon as you take it out of its charging unit.

Intuitive Use

Four resp. six contextual softkeys enable easy access to all available functions. Combined with their large, easy-to-read LCD display, use of the elmeg CS300 and elmeg CS310 is self-explanatory, making the operating instructions almost superfluous.

Alphanumeric Phone Directory

If you haven't memorized all your telephone numbers, or just simply wish to dial faster, you can store up to 250 names and phone numbers as your personal "VIP" numbers. Programming can be made on the phone itself, or easily at the PC with the phone directory tool that comes with the phone. The elmeg CS300 and elmeg CS310 also have access to the central phone directory of the PABX* that contains a further 1,000 alphanumeric entries.

*) Supported ISDN PABX systems with system functions: elmeg C44k, elmeg C46e, elmeg C46xe, elmeg C48m, elmeg C88m, elmeg D@VOS-44, elmeg D@VOS-20

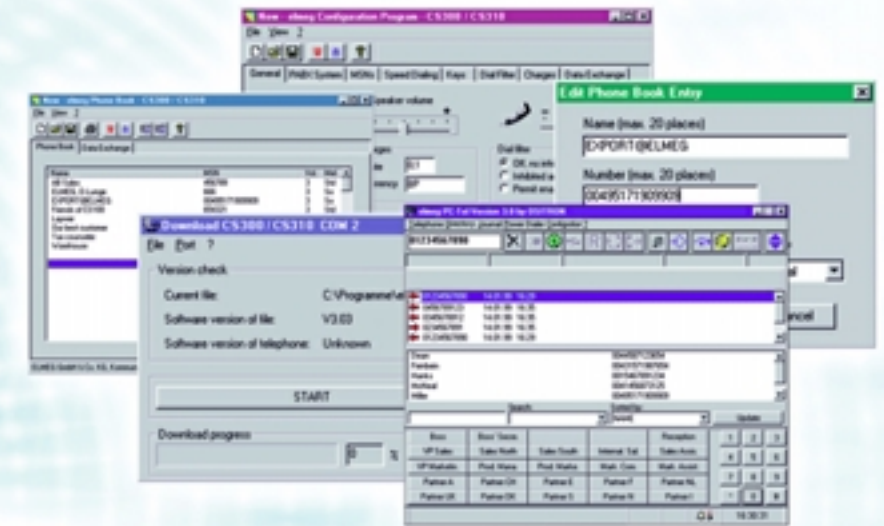

Integrated V.24 (RS232) interface with an RJ12 jack

Computer Telephony Integration using the TAPI Interface

Combining the elmeg CS300 or the elmeg CS310 with the PC via the integrated RJ12 jack makes it easy for you to use the most varying CTI applications. The Windows software PC-Tel 3.0 included with the system makes convenience calling via the PC a child's play. Fully compatible with Microsoft's TAPI™ standard, elmeg is setting new standards for CTI!

Comprehensive Software Package Included

Simple configuration and optimal use of the elmeg CS300/ elmeg CS310 is ensured by the elmeg WIN-Tools program that is included with the system: Configuration software, phone directory software, download manager and the PC-Tel 3.0 CTI application. Consistent software interfacing guarantees a high degree of transparency and optimizes use of the system for your individual needs.

Key Expansion Module T300 (optional accessory)

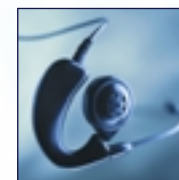

Expand the flexibility of your system phone to the max using the elmeg T300 key expansion module with 24 additional LED-assisted speed dialing keys that you can use either as a busy signal lamp panel or as function keys.

7 LED-assisted VIP Keys

The seven VIP keys can be assigned important telephone numbers, complex functions or even as line keys on two levels. The LED support their corresponding status indicators. As a result, you always have everything in view, such as which extensions are currently busy, or you can activate call rerouting or team membership with status indication at the push of a button.

Boss/Secretary Function

A business function for all types of businesses, ideal for legal offices or tax offices. If the boss does not wish to be disturbed, all calls made to that number are automatically put through to the secretary's phone. This function is also signaled by an LED.

Headset connection

Of course all elmeg system telephones are designed for the professional use with a headset – simply connect it and your hands are free during the call.

Integrated, fully digital answering machine (only elmeg CS310)

Don't worry about cable spaghetti or not having enough sockets ever again – the integrated answering machine of the elmeg CS310 has far outdistanced other convenience systems when it comes to flexibility, scope of functions and ease of use:

- Up to 25 minutes recording time
- Up to 10 different announcements, time-controlled
- Monitoring function
- Recording of ongoing calls
- Password-protected remote polling
- Recording period for messages can be limited to 30, 60 or 120 seconds
- Programmable notification for new messages (message forwarding)
- Ringing length can be set for each MSN
