Instrument Transformers Split type CT/CC2

Split type current transformers, CC2Primary current: 5 to 1200A

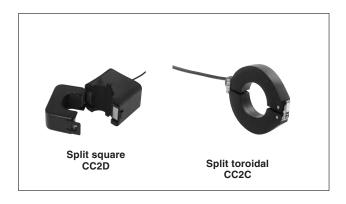

Secondary current: 7.34mA to 1A

■ Description

The CC2D and CC2C are split-type current transformers. The CT can be mounted to existing panels, such as control centers or load centers, to measure or monitor wattage. These CTs can be mounted without removing existing cables for easier installation.

Five rated burdens are available: 0.26mVA, 44.4mVA,

0.18VA, 0.5VA
