## Description

M/A-COM's ESMD-C50L is a Low Cost, Low Drive, Passive Double Double Balanced Mixer. Constructed using very broad band ferrite balun transformers and matched silicon schottky diodes, it's performance is especially suited to high dynamic range receivers. Given it's high 1dB compression point, the ESMD-C5OL is also suitable for Transmitter upconversion at any frequency up to 2.5 GHz . Parts are packaged in tape \& reel.
