

0.5 mm Pitch, 2.55 mm above the board, Flexible Printed Circuit & Flexible Flat Cable ZIF Connectors

FH28 Series

Secure actuator lock and retention

Hold in place by metal fittings

Hold in place by contacts

Overview

Continuing market trends demand higher contact count connectors while maintaining high electrical/mechanical reliability, exact FPC/FFC positioning and durability.

Features

1. Precise FFC/FPC positioning

Large angle of the actuator opening and built-in side guides in the connector allow straight and exact insertion of the FPC / FFC.

2. Rotating actuator

Proven rotating actuator system allows easy ZIF connection, confirming it with a definite tactile feel. The contact securely holds the actuator in place, providing reliable normal force. The unique contact configuration assures that the connector will remain dimensionally stable over the device's life.

3. Strong FFC / FPC retention force

Horizontal direction FFC / FPC retention force : Increased 200% (as compared with FH12 series)(30 pos.)

4. Standard FFC / FPC thickness

Reliable connection with the use of readily available 0.3 mm thick FFC/FPC.

5. Available in 20, 28, 30, 40, 45, 50, 55, 60, 64, 68, 74 and 80 contact positions.

Contact HRS for other contact positions.

6. Board placement with automatic equipment

Flat top surface and packaging on the tape-and-reel allows use of vacuum nozzles.

Standard reel contains 2,000 connectors.

FPC temporary hold protrusion

Support straight type FPC / FFC

Applications

LCD, PDP, notebook computers, HDD, video and audio equipment, OA equipment and other devices requiring high reliability ZIF connection of FFC/FPC.

◆ Operation and Precautions

Operation	Precautions
<p>1.FPC/FFC insertion procedure. Connector installed on the board.</p> <p>① Lift up the actuator. Use thumb or index finger</p>  <p>② Fully insert the FPC in the connector parallel to mounting surface, with the exposed conductive traces facing down.</p>  <p>③ Rotate down the actuator until firmly closed. It is critical that the inserted FPC/FFC is not moved and remains fully inserted.</p> 	<p>① Do not force the actuator to open beyond its fully open position. Do not use any type of tool to open the actuator.</p>  <p>② Do not forcefully bend the FFC/FPC upward. Consult FFC/FPC manufacturer for the recommended bend radiuses.</p>  <p>③ For connectors with multiple contacts, such as 80 pos. rotate down the actuator pushing at both ends.</p> 
<p>2.FPC/FFC removal</p> <p>Fully open the actuator. Carefully withdraw the FPC/FFC exercising caution not to deform or damage it.</p>
