Bi-Directional Zener Diodes

Outline

RSB18V is a bi-directional zener diode having two zeners confronted in one package, aimed to absorb the surge in plus and minus directions arising from the signal line in mobile phone, consumer electronics such as PC, and automotive applications.

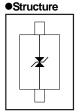

In general, two pieces of zener diodes are used as ESD protector to absorb the surge in +/ - directions. Paying attention to this point and using its original technology, ROHM succeeded to incorporate 2 zeners in one die / package for benefit of space-saving on the circuit board.

•Dimensions (Unit : mm)

Features

- 1) Absorption of plus & minus surge with one package.
- 2) Decrease of components and space-saving on the circuit board.

•Absolute maximum ratings (Ta=25°C)

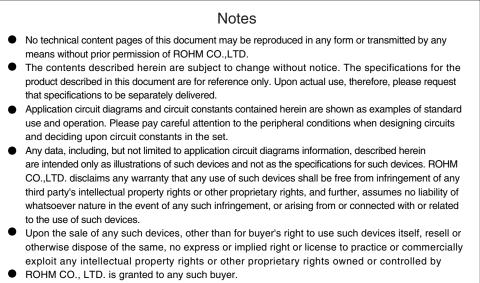

Parameter	Symbol	Limits	Unit
Power dissipation	Pd	200	mW
Junction temperature	Tj	150	°C
Operation temperature range	Tstg	-55 to +150	°C

•Electrical characteristics (Ta=25°C)

Parameter	Symbol	Min.	Max.	Unit	Conditions
Zener voltage	Vz	16.2	19.8	V	I _F =1mA
Reverse current	I _R	-	0.1	μA	V _R =13V
Capacitance between terminals	Ct	-	30	pF	V _R =0V , f=1MHz

* Zener voltage to be measured at 40ms after current starting to apply.

rohm

• Products listed in this document are no antiradiation design.

The products listed in this document are designed to be used with ordinary electronic equipment or devices (such as audio visual equipment, office-automation equipment, communications devices, electrical appliances and electronic toys).

Should you intend to use these products with equipment or devices which require an extremely high level of reliability and the malfunction of which would directly endanger human life (such as medical instruments, transportation equipment, aerospace machinery, nuclear-reactor controllers, fuel controllers and other safety devices), please be sure to consult with our sales representative in advance.

It is our top priority to supply products with the utmost quality and reliability. However, there is always a chance of failure due to unexpected factors. Therefore, please take into account the derating characteristics and allow for sufficient safety features, such as extra margin, anti-flammability, and fail-safe measures when designing in order to prevent possible accidents that may result in bodily harm or fire caused by component failure. ROHM cannot be held responsible for any damages arising from the use of the products under conditions out of the range of the specifications or due to non-compliance with the NOTES specified in this catalog.

Thank you for your accessing to ROHM product informations. More detail product informations and catalogs are available, please contact your nearest sales office.
