

Product Description

Sirenza Microdevices' SUF-3000 is a monolithically matched broadband high IP3 gain block covering 0.25-16 GHz. This pHEMT FET-based amplifier uses a patented self-bias Darlington topology featuring a gain and temperature compensating active bias network that operates from a single 5V supply. It offers efficient, cascadable performance in a compact 0.88 x 0.80 mm² die. It is well-suited for RF, LO, and IF driver applications.
