

DATA SHEET

SMV1247–SMV1255: Hyperabrupt Tuning Varactors

Features

- Designed for high-volume commercial applications
- High capacitance ratio, $C_{0.3 V}/C_{4.7 V} = 12$ typ.
- Multiple packages: SOT-23, SOD-323, SC-70 and SC-79
- Available lead (Pb)-free and RoHS-compliant MSL-1 @ 260 °C per JEDEC J-STD-020
- SPICE models are available
- Available in tape and reel packaging

Description

The SMV1247–SMV1255 series of silicon hyperabrupt junction varactor diodes is designed for use in VCOs with low tuning voltage operation. This family of varactors is characterized for capacitance and resistance over temperature. SPICE models are provided.

Skyworks offers lead (Pb)-free, RoHS (Restriction of Hazardous Substances)-compliant packaging.

Absolute Maximum Ratings

Characteristic	Value
Reverse voltage (V _R)	15 V
Forward current (I _F)	20 mA
Power dissipation (P _D)	250 mW
Storage temperature (T _{ST})	-55 °C to +150 °C
Operating temperature (T _{OP})	-55 °C to +125 °C
ESD human body model	Class 0

Performance is guaranteed only under the conditions listed in the specifications table and is not guaranteed under the full range(s) described by the Absolute Maximum specifications. Exceeding any of the absolute maximum/minimum specifications may result in permanent damage to the device and will void the warranty.

CAUTION: Although this device is designed to be as robust as possible, ESD (Electrostatic Discharge) can damage this device. This device must be protected at all times from ESD. Static charges may easily produce potentials of several kilovolts on the human body or equipment, which can discharge without detection. Industry-standard ESD precautions must be employed at all times.
