

Numeric LED

General Description

Sharp can supply wide color line-up for numeric LEDs-GaAlAs on GaAlAs (double hetero) super-luminosity U series (red), S series (sunset orange), K series (green). In addition to them, dichromatic type has realized an expressive display, changing the emission color according to display contents.

Sharp can also supply various character height (7.62mm to 38.1mm), and various digits type (1digit to 5digits) for your applications.

Numbering system

① Type: internal connection

3	Multi-digits Dynamic drive circuit
6	Multi-digits Cathode common
7	Multi-digits Anode common
8	1-digit Cathode common
9	1-digit Anode common

② Radiation color

Series	Radiation color
P	Red
U	Red(Super-luminosity)
T	Red(High-luminosity)
D	Red
S	Sunset orange
H	Yellow
E	Yellow-green
K	Green
ED	Yellow-green+Red
ET	Yellow-green+Red(High-luminosity)

③ Character size

03,030	8.0mm
04,040	10.16mm
156	14.12mm
56	14.22mm
08	20.32mm
100	25.4mm
15	38.1mm

④ No. of digits

2	2-digits
3	3-digits
4	4-digits
5	5-digits

Structure

Numeric LEDs are classified into 2 types ; substrate type and mold type as shown below. Substrate type employs thin package and can save the mount space. Mold type has realized high reliability because it is molded by resin.

Notice In the absence of confirmation by device specification sheets, SHARP takes no responsibility for any defects that may occur in equipment using any SHARP devices shown in catalogs, data books, etc. Contact SHARP in order to obtain the latest device specification sheets before using any SHARP device.

Surface Mount Type Numeric LED

General Description

Sharp's GL8D03M series, GL8D04M series, GL8D56M series are 1-digit, thin package surface mount type numeric LEDs. (character height: 8.0/10.16/14.22 mm). It is unnecessary to adjust the mounting height because the thickness of each series is the same. They are suited for measuring equipment and various thin type display systems.

Dichromatic Numeric LED

■ General Description

Sharp's dichromatic numeric LEDs GL9ED08 series, GL8ED100 series are 1-digit large size numeric LEDs(character height: 20.32/25.4mm). They have realized expressive display, changing the radiation color according to display type.

They are suited for measuring equipment, amusement equipment, and various displays.

NOTICE

- The circuit application examples in this publication are provided to explain representative applications of SHARP devices and are not intended to guarantee any circuit design or license any intellectual property rights. SHARP takes no responsibility for any problems related to any intellectual property right of a third party resulting from the use of SHARP's devices.
- Contact SHARP in order to obtain the latest device specification sheets before using any SHARP device. SHARP reserves the right to make changes in the specifications, characteristics, data, materials, structure, and other contents described herein at any time without notice in order to improve design or reliability. Manufacturing locations are also subject to change without notice.
- Observe the following points when using any devices in this publication. SHARP takes no responsibility for damage caused by improper use of the devices which does not meet the conditions and absolute maximum ratings to be used specified in the relevant specification sheet nor meet the following conditions:
 - (i) The devices in this publication are designed for use in general electronic equipment designs such as:
 - Personal computers
 - Office automation equipment
 - Telecommunication equipment [terminal]
 - Test and measurement equipment
 - Industrial control
 - Audio visual equipment
 - Consumer electronics
 - (ii) Measures such as fail-safe function and redundant design should be taken to ensure reliability and safety when SHARP devices are used for or in connection with equipment that requires higher reliability such as:
 - Transportation control and safety equipment (i.e., aircraft, trains, automobiles, etc.)
 - Traffic signals
 - Gas leakage sensor breakers
 - Alarm equipment
 - Various safety devices, etc.
 - (iii) SHARP devices shall not be used for or in connection with equipment that requires an extremely high level of reliability and safety such as:
 - Space applications
 - Telecommunication equipment [trunk lines]
 - Nuclear power control equipment
 - Medical and other life support equipment (e.g., scuba).
- Contact a SHARP representative in advance when intending to use SHARP devices for any "specific" applications other than those recommended by SHARP or when it is unclear which category mentioned above controls the intended use.
- If the SHARP devices listed in this publication fall within the scope of strategic products described in the Foreign Exchange and Foreign Trade Control Law of Japan, it is necessary to obtain approval to export such SHARP devices.
- This publication is the proprietary product of SHARP and is copyrighted, with all rights reserved. Under the copyright laws, no part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, for any purpose, in whole or in part, without the express written permission of SHARP. Express written permission is also required before any use of this publication may be made by a third party.
- Contact and consult with a SHARP representative if there are any questions about the contents of this publication.
