

# **CD650**

# Dual Channel High Speed Optically Coupled Isolator

Isocom Ltd supplies high reliability devices for applications requiring an operating temperature range of -55°C to +125°C (e.g. military applications).

Devices supplied are approved to BS9400, and have completed rigorous testing. Various high reliability test options are offered.

As a manufacturer of high reliability optocouplers, the Isocom Ltd manufacturing plant in the North East of England has site approval to BS9000 (registration number 1294/M) and CECC20000 (registration number M/1084/CECC/UK) issued by the British Standards Institution.

Together with CECC, BS9000 is a preferred standard for use in European military projects. Consequently, Isocom Ltd's approved devices are listed in the CECC "MUAHAG" preferred products list.

The BS9000 approval is also recognised as meeting the equivalent criteria to those required by BS5750/IS09000/EN29000.

The Company's customers can be assured of our commitment to stringent quality, reliability and inspection standards, as demonstrated by our existing approvals. Other customer specific options can also be offered.

### **Description**

The CD650 is a dual channel device hermetically sealed in a 8 pin ceramic package. It incorporates GaAsP LED emitters and high gain integrated photo detectors. The outputs are open collector Schottky clamped transistors.

### **Absolute Maximum Ratings**

Storage temperature ..... -65°C to +150°C
Operating temperature ..... -55°C to +125°C
Lead solder temperature ..... 260°C for 10S

(1.6mm below seating plane)

### Input Diode Output Detector

Forward DC current ..... 20mA Supply Voltage V<sub>CC</sub>..... 7V(1 Minute max)

Reverse DC voltage ..... 5V Current I<sub>O</sub>..... 25mA
Peak forward current .....40mA Collector Power Dissipation ..... 40mW

 $(\leq 1 \text{ mS duration}) \qquad \qquad Voltage \qquad \qquad V_O..... \qquad 7V$ 

Power Dissipation ..... 35mW

**Total Package** 

Power Dissipation 350mW
