L = low range [f_L to $10f_L$] M = mid range [$10f_L$ to $f_U/2$] U = upper range [$f_U/2$ to f_U]

features

- ADC & TCD, extremely flat bandwidth coupling
- ADC low height 0.112" max.
- low insertion loss
- wideband frequency
- TCD & JDC models, solder plated leads for strain relief & excellent solderability.

applications

- communications
- cable tv
- level detecting
- signal sampling
- reflective power measurements

NOTES:

- ◆ Aqueous washable. For non-aqueous requirements, LRDC units available in case style QQQ130.
- Denotes 75 ohm models.
- ⊛ When specification for only M range given, specification applies to entire frequency range.
- * TCD models protected under U.S. Patent 6140887; ADC models protected under U.S. Patents 6140887, 6133525
- A. Environmental specifications and re-flow soldering information available in General Information Section.
- B. Units are non-hermetic unless otherwise noted. For details on case dimensions & finishes see "Case Styles & Outline Drawings".
- C. Prices and Specifications subject to change without notice.
- 1. Mainline Loss includes theoretical power loss at coupled port.
