

AL240 Sales Kit Standalone Video Decoder Device

The AL240 standalone video decoder device provides an easy solution for video decoding function. It is mainly composed of video decoder (AL240) and other chips such as video encoder and microcontroller.

It supports input connectors including analog CVBS and S-video. It provides cost-effective and high-quality NTSC/PAL/SECAM video decoding with an adaptive comb-filter Y/C separation process. It is also equipped with BCS (Brightness, Contrast, Saturation and Hue) control for interlaced video and fast channel switch under CVBS video inputs.

AL240 Sales Kit Standalone Video Decoder Device

Features

- High quality adaptive comb-filter for Y/C separation
- > Various analog video types and inputs
- BCS (Brightness, Contrast, Saturation and Hue) control
- Support analog CVBS, S-Video & YPrPb outputs

Specifications

Video Input Types

- NTSC M/4.43 Standard
- > PAL –I/B/G/H/D/N/M Standard
- SECAM Standard

Video Input Formats

- > CVBS (RCA)
- S-Video (Y/C)

Video Output

- CVBS (RCA)
- YPrPb Component (RCA)
- S-Video (Y/C)

Debug Port

- RS232 Serial Port (DB-9 connector)
- 2-Wire Serial Bus Port

Mechanical

- S-Video and RCA composite video input connectors for external analog video sources
- 48-pin connector is used for digital video & control signal

Fast channel switch with smooth display under CVBS input signals

- Close Caption VBI detection & decoding
- 10bit ADC for high analog video conversion quality

Ordering Information

Part	AL240C-EVB-A1
Number	
Description	AL240 EVB Kit Package Contents
	> Hardware
	AL240 Standalone Video Decoder EVB
	Device
	Video Cables, Power Cord and Adapter
	AL240 EVB H/W Reference Design
	(includes schematics, Gerber & layout files,
	<u>By Request</u>)
	> Software
	AL240 EVB S/W Reference Design
	(includes source code & binary files, <u>By</u>
