

# CLI325

## IRED - Photodarlington Photointerrupter

December, 2001

### features

- rugged plastic package
- hermetically sealed discretes
- narrow beam alignment

### description

The CLI325 consists of an IRED and a photodarlington mounted in a black plastic housing. It features 12 inch leads and two holes for bracket mounting in any position. There are no internal biasing resistors which allows more design flexibility and utilization of the high output capability of the photodarlington. For assistance, call Clairex.
