

SPECIFICATION

PART NO. : MT5300B-UY

5.0mm ROUND LED LAMP

Description

This yellow lamp is made with AlGaInP/GaP chip and white diffused epoxy resin.

Notes:

- 1. All dimensions are in mm.
- 2. Tolerance is ± 0.25 mm unless otherwise noted.

Description

Part No.	LED Chip		Lens Color
	Material	Emitting Color	
MT5300B-UY	AlGaInP/GaP	Yellow	White diffused

Absolute Maximum Ratings at Ta=25

Parameter	Symbol	Rating	Unit
Power Dissipation	P _D	130	mW
Reverse Voltage	V _R	5	V
D.C. Forward Current	I _f	50	mA
Reverse (Leakage) Current	I _r	100	μA
Peak Current(1/10Duty Cycle,0.1ms Pulse Width.)	I _f (Peak)	200	mA
Operating Temperature Range	T _{opr.}	-40 to +95	
Storage Temperature Range	T _{stg.}	-40 to +100	
Soldering Temperature(1.6mm from body)	T _{sol.}	Dip Soldering : 260 for 5 sec. Hand Soldering : 350 for 3 sec.	
Electrostatic discharge	ESD.	6000	V

Electrical and Optical Characteristics:

Parameter	Symbol	Condition	Min.	Typ.	Max.	Unit
Luminous Intensity	I _v	I _f =20mA	3000	4800		mcd
Forward Voltage	V _f	I _f =20mA		2.1	2.6	V
Peak Wavelength	λ _p	I _f =20mA		591		nm
Dominant Wavelength	λ _d	I _f =20mA	584	589	596	nm
Reverse (Leakage) Current	I _r	V _r =5V			100	μA
Viewing Angle	2 1/2	I _f =20mA		30		deg
Spectrum Line Halfwidth	Δλ	I _f =20mA		15		nm

Notes: 1. The datas tested by IS tester.

2. Customer's special requirements are also welcome.

Typical Electrical / Optical Characteristics Curves :

FORWARD CURRENT VS.APPLIED VOLTAGE

FORWARD CURRENT VS. LUMINOUS INTENSITY

FORWARD CURRENT VS. AMBIENT TEMPERATURE

RADIATION DIAGRAM

Specifications for Bin Grading:

Iv(mcd)		
BIN	MIN.	MAX.
W	3000	4180
X	4180	5860
Y	5860	8200

Specifications for Vf Group:

Vf(V)		
Group	MIN.	MAX.
V1	1.6	1.8
V2	1.8	2.0
V3	2.0	2.2
V4	2.2	2.4
V5	2.4	2.6

*Majority VF bins are highlighted in Yellow.

Specifications for Wavelength Group:

D(nm) @20mA		
Group	MIN.	MAX.
X2	584	587
X3	587	590
X4	590	593
X5	593	596

Precautions:

TAKE NOTE OF THE FOLLOWING IN USE OF LED

1. Temperature in use

Since the light generated inside the LED needs to be emitted to outside efficiently, a resin with high light transparency is used; therefore, additives to improve the heat resistance or moisture resistance (silica gel, etc) which are used for semiconductor products such as transistors cannot be added to the resin.

Consequently, the heat resistant ability of the resin used for LED is usually low; therefore, please be careful on the following during use.

Avoid applying external force, stress, and excessive vibration to the resins and terminals at high temperature. The glass transition temperature of epoxy resin used for the LED is approximately 120-130 .

At a temperature exceeding this limit, the coefficient of linear expansion of the resin doubles or more compared to that at normal temperature and the resin is softened.

If external force or stress is applied at that time, it may cause a wire rupture.

2. Soldering

Please be careful on the following at soldering.

After soldering, avoid applying external force, stress, and excessive vibration until the products go to cooling process (normal temperature), <Same for products with terminal leads>

(1) Soldering measurements:

Distance between melted solder side to bottom of resin shall be 1.6mm or longer.

(2) Dip soldering :

Pre-heat: 90 max. (Backside of PCB), Within 60 seconds.

Solder bath: 260±5 (Solder temperature), Within 5 seconds.

(3) Hand soldering: 350 max. (Temperature of soldering iron tip), Within 3 seconds.

3. Insertion

Pitch of the LED leads and pitch of mounting holes need to be same.

4. Others

Since the heat resistant ability of the LED resin is low, SMD components are used on the same PCB, please mount the LED after adhesive baking process for SMD components. In case adhesive baking is done after LED lamp insertion due to a production process reason, make sure not to apply external force, stress, and excessive vibration to the LED and follow the conditions below.

Baking temperature: 120 max. Baking time: Within 60 seconds.

If soldering is done sequentially after the adhesive baking, please perform the soldering after cooling down the LED to normal temperature.
