

Model Number

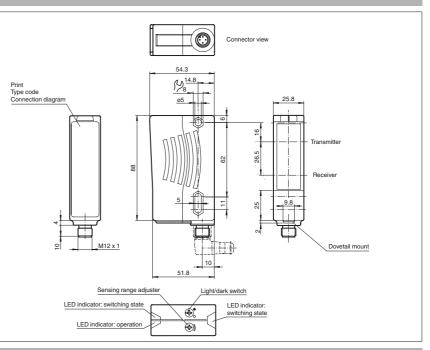

RL28-8-H-400-RT/47/73c

Background suppression sensor with 4-pin, M12 x 1 plastic connector

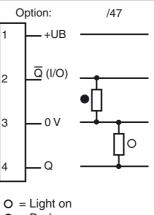

Features

- Ultra bright LEDs for power on and switching state
- Good alignability due to red transmission LED
- Not sensitive to ambient light, even with switched energy saving lamps
- Waterproof, protection degree IP67
- Protection class II

Dimensions

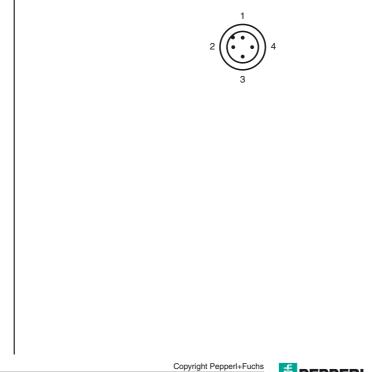

Electrical connection

= Dark on

Pinout

rechnical data		
General specifications		
Detection range		20 400 mm
Detection range min.		20 150 mm
Detection range max.		20 400 mm
Light source		LED
Light type		modulated visible red light , 660 nm
Black/White difference (6 %/90 %)	< 10 %
Diameter of the light spot		approx. 12 mm at a distance of 400 mm
Angle of divergence		Emitter 1.2°, Receiver 2°
Ambient light limit		50000 Lux
Functional safety related parame	eters	
MTTF _d		1130 a
Mission Time (T _M)		20 a
Diagnostic Coverage (DC)		0 %
Indicators/operating means		
Operating display		LED green
Function display		2 LEDs yellow ON: object inside the scanning range OFF: object outside the scanning range
Controls		Light/Dark switch
Controls		Detection range adjuster
Electrical specifications		
Operating voltage	UB	10 30 V DC
Ripple		10 %
No-load supply current	I ₀	≤ 40 mA
Output		
Switching type		light/dark on switchable
Signal output		2 PNP, complementary, short-circuit protected, reverse polarity protected , open collectors
Switching voltage		max. 30 V DC
Switching current		max. 200 mA
Switching frequency	f	250 Hz
Response time		2 ms
Ambient conditions		
Ambient temperature		-40 60 °C (-40 140 °F)
Storage temperature		-40 75 °C (-40 167 °F)
Mechanical specifications		
Protection degree		IP67
Connection		connector M12 x 1, 4-pin
Material		
Housing		Plastic ABS
Optical face		plastic
Mass		70 g
Compliance with standards and ves	directi-	
Standard conformity		
Product standard		EN 60947-5-2:2007
Approvale and cartificates		
Approvals and certificates Protection class		II. roted veltage < 050 V/AC with pellution degree 1.0 second
UL approval		II, rated voltage ≤ 250 V AC with pollution degree 1-2 accor- ding to IEC 60664-1 cULus
CCC approval		Products with a maximum operating voltage of ≤36 V do not
		bear a CCC marking because they do not require approval.

Curves/Diagrams

Additional information

Intended use:

The transmitter and receiver are located in the same housing for direct detection sensors with background masking. Marking of objects outside the detection range is achieved by arranging the angle between the transmitter and receiver (2 receiver elements).

Objects are detected independently of their surface structures, brightness and colour, as well as the brightness of the background.

Mounting instructions:

The sensors can be fastened directly with fixing screws or with a support bracket (not included with delivery).

The surface underneath must be flat to prevent the housing from moving when it is tightened into position. We recommend securing the nut and screw in place with spring washers to prevent the sensor from going out of adjustment.

Adjustment:

After the operating voltage is applied, the LED is lit green.

Align the sensor to the background. If the yellow LED is lit, the detection range should be reduced with the detection range adjuster until the yellow LED goes out.

Object direction:

Place the object to be detected at the desired maximum detection range and align the light spot to it. If the object is detected, the yellow LED lights up.

If it does not light up, the detection range must be adjusted on the potentiometer until it lights up when an object is detected.

Cleaning:

We recommend cleaning the optical surface and checking the screwed connection and other connections at regular intervals.
