

Model Number

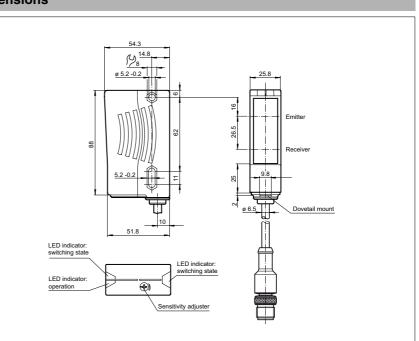

RL28-8-H-700-RT-3019/47/115b

Background suppression sensor with 0.2 m fixed cable and 4-pin, M12 connector

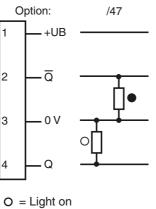

Features

- Ultra bright LEDs for power on and switching state
- Good alignability due to red transmission LED
- Not sensitive to ambient light, even with switched energy saving lamps
- Waterproof, protection degree IP67
- Protection class II

Dimensions

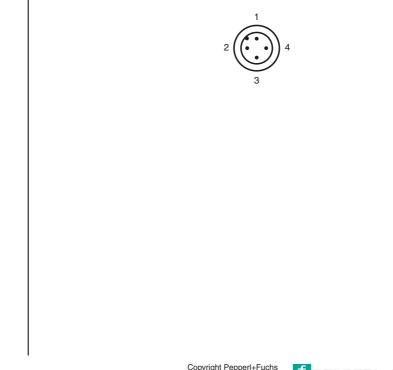

Electrical connection

= Dark on

Technical data			Accessories	
General specifications			OMH-05	
Detection range		20 700 mm	Mounting aid for round steel ø 12 mm o	
Detection range min.		20 200 mm	sheet 1.5 mm 3 mm	
Detection range max.		20 700 mm		
Background suppression		max. + 10 % of the upper limit of the detection range	OMH-07 Mounting aid for round steel ø 12 mm o sheet 1.5 mm 3 mm	
Light source		LED		
Light type		modulated visible red light , 660 nm		
Black/White difference (6 %/	90 %)	< 20 %		
Diameter of the light spot		approx. 15 mm at a distance of 700 mm	OMH-21	
Angle of divergence		Emitter 1.2°, Receiver 2°	Mounting bracket	
Ambient light limit		50000 Lux	OMH-22	
Functional safety related pa	rameters		Mounting bracket	
MTTFd		1130 a		
Mission Time (T _M)		20 a	OMH-MLV11-K	
Diagnostic Coverage (DC)		0 %	dove tail mounting clamp	
Indicators/operating means				
Operating display		LED green	OMH-RLK29	
Function display		2 LEDs yellow ON: object inside the scanning range	Mounting bracket OMH-RLK29-HW	
		OFF: object outside the scanning range		
Controls		Detection range adjuster	Mounting bracket for rear wall mounting	
Electrical specifications			OMH-RL28-C	
Operating voltage	U _B	10 30 V DC	Protective cover	
Ripple		10 %		
No-load supply current	I ₀	≤ 40 mA	Other suitable accessories can be found a	
Output			www.pepperl-fuchs.com	
Switching type		light/dark on		
Signal output		2 PNP, complementary, short-circuit protected, reverse polarity protected , open collectors		
Switching voltage		max. 30 V DC		
Switching current		max. 200 mA		
Switching frequency	f	250 Hz		
Response time		2 ms		
Ambient conditions				
Ambient temperature		-40 60 °C (-40 140 °F)		
Storage temperature		-40 75 °C (-40 167 °F)		
Mechanical specifications		()		
Protection degree		IP67		
Connection		0.2 m fixed cable with 4-pin, M12 connector		
Material				
Housing		Plastic ABS

Curves/Diagrams

Additional information

Intended use:

The transmitter and receiver are located in the same housing for direct detection sensors with background masking. Marking of objects outside the detection range is achieved by arranging the angle between the transmitter and receiver (2 receiver elements).

Objects are detected independently of their surface structures, brightness and colour, as well as the brightness of the background.

Mounting instructions:

The sensors can be fastened directly with fixing screws or with a support bracket (not included with delivery).

The surface underneath must be flat to prevent the housing from moving when it is tightened into position. We recommend securing the nut and screw in place with spring washers to prevent the sensor from going out of adjustment.

Adjustment:

After the operating voltage is applied, the LED is lit green.

Align the sensor to the background. If the yellow LED is lit, the detection range should be reduced with the detection range adjuster until the yellow LED goes out.

Object direction:

Place the object to be detected at the desired maximum detection range and align the light spot to it. If the object is detected, the yellow LED lights up.

If it does not light up, the detection range must be adjusted on the potentiometer until it lights up when an object is detected.

Cleaning:

We recommend cleaning the optical surface and checking the screwed connection and other connections at regular intervals.
