#### General Description

The AAT7201 is a 10+1-channel buffer designed to increase the driving capability for thin film transistor liquid crystal display (TFT LCD). This device includes a  $V_{\text{com}}$  buffer circuit, four rail-to-rail buffer amplifier circuits and six buffer amplifier circuits. Each buffer is capable of driving heavy capacitive loads and offering fast current loading ( $V_{\text{com}}$ : 100mA, the others: 30mA).

AAT7201 comes in a space-saving TQFP48 package, which makes it an ideal component in LCD TV and monitors.
