DESCRIPTION

The TS339 is a micropower CMOS quad voltage comparator with extremely low consumption of 9µA typ / comparator (20 times less than bipolar LM339). Similar performances are offered by the quad micropower comparator TS3704 with a push-pull CMOS output.

Thus response times remain similar to the LM339.

- Notes :**
1. All voltage values, except differential voltage, are with respect to network ground terminal.
 2. Differential voltages are the non-inverting input terminal with respect to the inverting input terminal.
 3. The magnitude of the input and the output voltages must never exceed the magnitude of the positive supply voltage.
 4. Short circuit from outputs to V_{CC}^+ can cause excessive heating and eventual destruction.
