Description

M/A-COM's MASW-007656 is a broadband GaAs PHEMT MMIC diversity switch available in a low cost, lead-free 3 mm 12-lead PQFN package. The MASW-007656 is ideally suited for applications where very small size and low cost are required.

Typical applications are for WLAN IEEE 802.11a and 802.11b/g systems that employ two antennas for transmit and receive diversity. Other applications include cordless phones and base stations. Designed for high power, this DPDT switch maintains high linearity up to 6.0 GHz.

The MASW-007656 is fabricated using a 0.5 micron gate length GaAs PHEMT process. The process features full passivation for performance and reliability.
