Differential video amplifier

μ A733/733C

DESCRIPTION

The 733 is a monolithic differential input, differential output, wide-band video amplifier. It offers fixed gains of 10, 100, or 400 without external components, and adjustable gains from 10 to 400 by the use of an external resistor. No external frequency compensation components are required for any gain option. Gain stability, wide bandwidth, and low phase distortion are obtained through use of the classic series-shunt feedback from the emitter-follower outputs to the inputs of the second stage. The emitter-follower outputs provide low output impedance, and enable the device to drive capacitive loads. The 733 is intended for use as a high-performance video and pulse amplifier in communications, magnetic memories, display and video recorder systems.

FEATURES

- 120MHz bandwidth
- 250k Ω input resistance
- Selectable gains of 10, 100, and 400
- No frequency compensation required
- MIL-STD-883A, B, C available

PIN CONFIGURATION

Figure 1. Pin Configuration

APPLICATIONS

- Video amplifier
- Pulse amplifier in communications
- Magnetic memories
- Video recorder systems

ORDERING INFORMATION

DESCRIPTION	TEMPERATURE	ORDER CODE	DWG #
14-Pin Plastic Dual In-Line Package (DIP)	-55°C to +125°C	μ A733N	SOT27-1
14-Pin Plastic Dual In-Line Package (DIP)	0 to +70°C	μ A733CN	SOT27-1

CIRCUIT SCHEMATIC

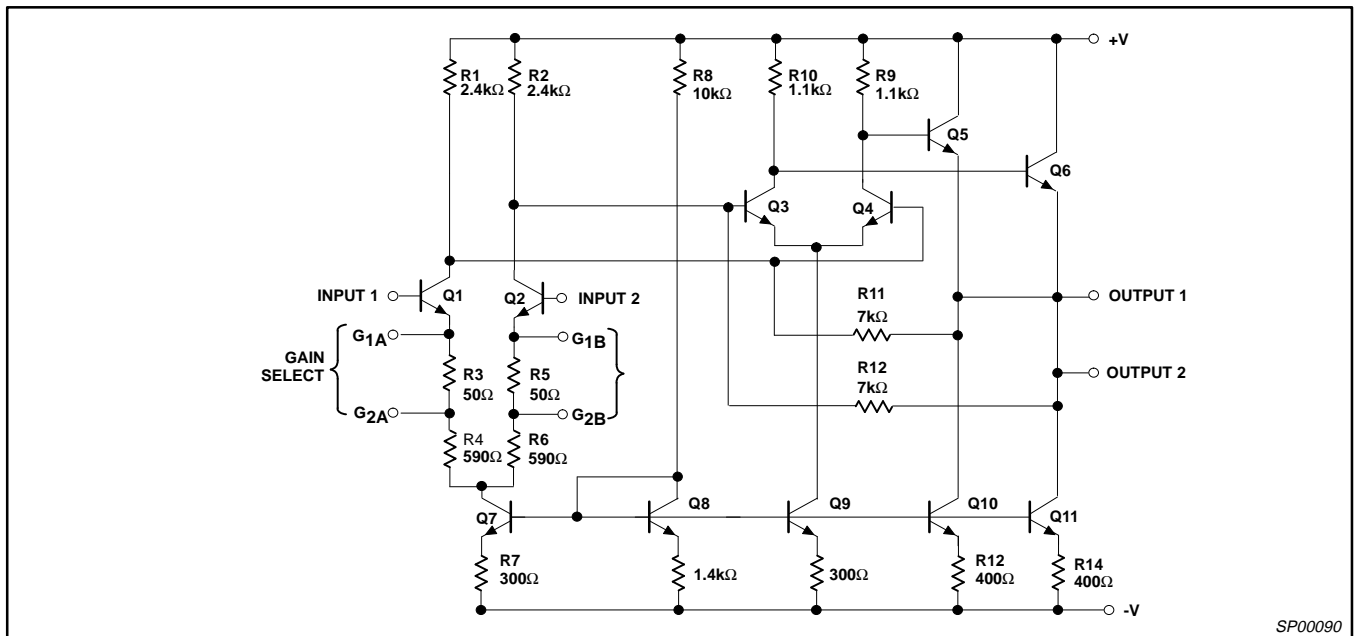

Figure 2. Circuit Schematic

Differential video amplifier

ABSOLUTE MAXIMUM RATINGS

SYMBOL	PARAMETER	RATING	UNIT
V _{DIFF}	Differential input voltage	±5	V
V _{CM}	Common-mode input voltage	±6	V
V _{CC}	Supply voltage	±8	V
I _{OUT}	Output current	10	mA
T _J	Junction temperature	+150	°C
T _{STG}	Storage temperature range	-65 to +150	°C
T _A	Operating ambient temperature range μ A733C μ A733	0 to +70 -55 to +125	°C °C
P _{D MAX}	Maximum power dissipation, 25°C ambient temperature (still-air) ¹	1420	mW

NOTE:

1. The following derating factors should be applied above 25°C:
N package at 11.4mW/°C

DC ELECTRICAL CHARACTERISTICS

T_A=+25°C, V_S=±6V, V_{CM}=0, unless otherwise specified. Recommended operating supply voltages V_S=±6.0V.

SYMBOL	PARAMETER	TEST CONDITIONS	μ A733C			μ A733			UNIT
			Min	Typ	Max	Min	Typ	Max

DEFINITIONS

Data Sheet Identification	Product Status	Definition
<i>Objective Specification</i>	Formative or in Design	This data sheet contains the design target or goal specifications for product development. Specifications may change in any manner without notice.
<i>Preliminary Specification</i>	Preproduction Product	This data sheet contains preliminary data, and supplementary data will be published at a later date. Philips Semiconductors reserves the right to make changes at any time without notice in order to improve design and supply the best possible product.
<i>Product Specification</i>	Full Production	This data sheet contains Final Specifications. Philips Semiconductors reserves the right to make changes at any time without notice, in order to improve design and supply the best possible product.

Philips Semiconductors and Philips Electronics North America Corporation reserve the right to make changes, without notice, in the products, including circuits, standard cells, and/or software, described or contained herein in order to improve design and/or performance. Philips Semiconductors assumes no responsibility or liability for the use of any of these products, conveys no license or title under any patent, copyright, or mask work right to these products, and makes no representations or warranties that these products are free from patent, copyright, or mask work right infringement, unless otherwise specified. Applications that are described herein for any of these products are for illustrative purposes only. Philips Semiconductors makes no representation or warranty that such applications will be suitable for the specified use without further testing or modification.

LIFE SUPPORT APPLICATIONS

Philips Semiconductors and Philips Electronics North America Corporation Products are not designed for use in life support appliances, devices, or systems where malfunction of a Philips Semiconductors and Philips Electronics North America Corporation Product can reasonably be expected to result in a personal injury. Philips Semiconductors and Philips Electronics North America Corporation customers using or selling Philips Semiconductors and Philips Electronics North America Corporation Products for use in such applications do so at their own risk and agree to fully indemnify Philips Semiconductors and Philips Electronics North America Corporation for any damages resulting from such improper use or sale.
