

**Technical Data**

Output signal distance	analog 20...0mA, 0...10V and 10...0V
Output signal velocity	analog +/- 10V at +/- 2,5m/s
Connector	Edge connector 32pol. DIN 41612F
Input interface (transducer)	P-Interface
Supply voltage	24VDC +/- 20%
Current draw	at 24V DC 130mA
Operating temperature	0...60°C
Up-Date-Time	1kHz
Interface	analog Current
Features	Resolution 0,1mV/ 0,2µA, LED function display, Null adjust 15%, Span adjust 15%, Velocity output, Error output (relay).
Accessories	48 pin card holder FormF(627164) (please order separately)
