### BF510 to 513

#### **DESCRIPTION**

Asymmetrical N-channel planar epitaxial junction field-effect transistors in the miniature plastic envelope intended for applications up to the v.h.f. range in hybrid thick and thin-film circuits. Special features are the low feedback capacitance and the low noise figure. These features make the product very suitable for applications such as the r.f. stages in f.m. portables (BF510), car radios (BF511) and mains radios (BF512) or the mixer stage (BF513).

#### **PINNING - SOT23**

1 = gate

2 = drain

3 = source

#### **MARKING CODE**

BF510 = S6p

BF511 = S7p

BF512 = S8p

BF513 = S9p

#### **QUICK REFERENCE DATA**

BF510 to 513

#### **RATINGS**

Limiting values in accordance with the Absolute Maximum System (IEC 134)

| Drain-source voltage                                            | $V_{DS}$    | max.     | 20    | V  |
|-----------------------------------------------------------------|-------------|----------|-------|----|
| Drain-gate voltage (open source)                                | $V_{DGO}$   | max.     | 20    | V  |
| Drain current (DC or average)                                   | $I_D$       | max.     | 30    | mΑ |
| Gate current                                                    | $\pm I_{G}$ | max.     | 10    | mΑ |
| Total power dissipation up to T <sub>amb</sub> = 40 °C (note 1) | $P_{tot}$   | max.     | 250   | mW |
| Storage temperature range                                       | $T_{stg}$   | –65 to ⊣ | - 150 | °C |
| Junction temperature                                            | $T_j$       | max.     | 150   | °C |

#### THERMAL RESISTANCE

From junction to ambient (note 1)  $R_{th j-a} = 430 \text{ K/W}$ 

#### Note

1. Mounted on a ceramic substrate of 8 mm  $\times$  10 mm  $\times$  0.7 mm.

#### STATIC CHARACTERISTICS

 $T_{amb} = 25 \, ^{\circ}C$
