

Product Specification

P1935

Power Amplifier 1880-1920 MHz, 35 dB min. Gain @ 1900 Hz @ 33.5 dBm Output

FEATURES

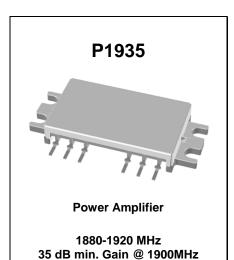

- 1.9 GHz Power Amplifier Module
- Typical 33.5 dBm output power
- Excellent adjacent leakage power
- Typical 35.7 dB power gain
- Low cost metal package

APPLICATION

• Final stage power amplifier of base station for PHS

DESCRIPTION

• The P1935 is a high performance 1.9 GHz band power amplifier offering excellent linearity. The device provides 33.5 dBm output power with a typical 35.7 dB gain at 1.9 GHz. It is housed in a cost effective metal package and operates from +10 V and -5 V power supplies.

LIMITING VALUES

Notes: Operating the device above these parameters may cause permanent damage, Case Temperature T_c =25°C

SYMBOL	PARAMETER	MIN.	MAX.	UNIT
V ₁		-	12	V
V ₂	DC supply voltage	-	-7	V
Pin	Input Power	-	10	dBm
T _{stg}	Storage Temperature	- 40	+ 95	°C
T _{opt}	Operating Temperature	- 20	+ 80	°C

CHARACTERISTICS

Table 1: Test condition 25°C

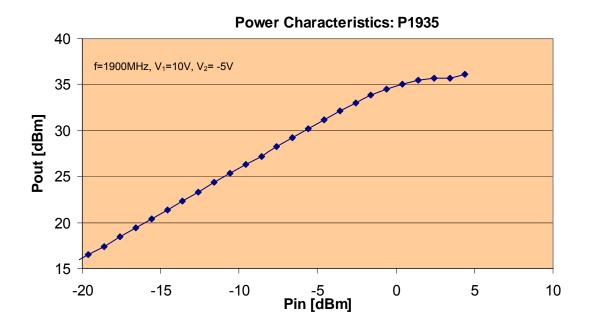

SYMBOL	PARAMETER	CONDITIONS	MIN.	TYP.	MAX.	UNIT
f	Frequency		1880		1920	MHz
ld	Supply Current		-	1200	1270	mA
Ga	Power Gain	P _{out} =33.5 dBm	35	35.7	-	dB
	Input VSWR	V ₁ = 10 V	-	1.5	2.5	-
2f0	Harmonic Distortion	V ₂ = -5 V	-	-55	-40	dBc
3f0	Harmonic Distortion		-	-55	-36	dBc
Padj1	Adjacent Channel	± 600 kHz	-	-64	-61	dBc
Padj2	Leakage Power ¹⁾	± 900 kHz	-	-71	-69	dBc

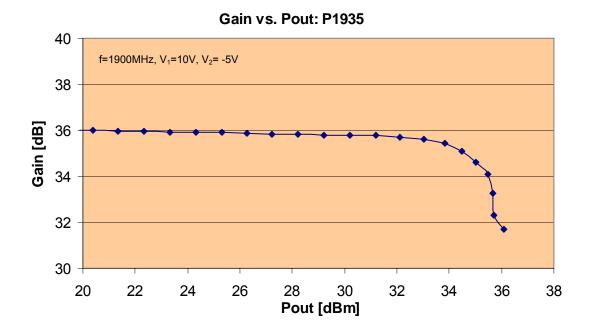

Notes:1) RF signal modulation is per PHS RCR-28

DEFINITIONS

Data Sheet Status	
Objective Product	This data sheet contains target or goal specifications for product
Specification	development.
Preliminary Product	This data sheet contains preliminary data; supplementary data may
Specification	be published later.
Product Specification	This data sheet contains final product specifications.
Limiting values	
Stress above one or more These are stress ratings o above those given in the C	n accordance with the Absolute Maximum Rating System (IEC 60134). of the limiting values may cause permanent damage to the device. nly and operation of the device at these or at any other conditions Characteristics sections of the specification is not implied. Exposure to d periods may affect device reliability.
Application information	
Where application informa	tion is given, it is advisory and does not form part of the specification.

Premier Devices reserves the right to make changes without further notice to any products herein.

Premier Devices makes no warranty representation or guarantee regarding the suitability of its products for any particular purpose, nor does Premier Devices assume any liability arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation consequential or incidental damages. "Typical" parameters which may be provided in Premier Devices datasheets and/or specifications can and do vary in different applications and actual performance may vary over time. All operating parameters, including "Typicals" must be validated for each customer application by customer's technical experts. Premier Devices does not convey any license under its patent rights nor the rights of others. Premier Devices products are not designed, intended, or authorized for use as components in systems intended for surgical implant into the body, or other applications intended to support or sustain injury or death may occur. Should Buyer purchase or use Premier Devices products for any such unintended or unauthorized application, Buyer shall indemnify and hold Premier Devices and its officers, employees, subsidiaries, arising out of, directly or indirectly, and claim of personal injury or death associated with such unintended or unauthorized use, even if such claim alleges that Premier Devices was negligent regarding the design or manufacture of the part.
