Overview

Small Form-Factor Pluggable (SFP) interfaces from MRV Communications provide flexible high speed links in a small industry-standard package. They deliver the deployment options and inventory control that network administrators demand for growing networks.

SFPs are designed to Multi-Source Agreement (MSA) standards to ensure network equipment compatibility. They are a perfect addition to MRV’s extensive lines of networking equipment.

- Notes:**
- TX Fault is an open collector output, which should be pulled up with a 4.7 k~10 k Ω resistor on the host board to a voltage between 2.0 V and $V_{CC}+0.3V$. Logic 0 indicates normal operation; logic 1 indicates a laser fault of some kind. In the low state, the output will be pulled to less than 0.8 V.
 - TX Disable is an input that is used to shut down the transmitter optical output. It is pulled up within the module with a 4.7 k~10 k Ω resistor. Its states are:
 Low (0~0.8 V): Transmitter on
 (>0.8V, <2.0V): Undefined
 High (2.0~3.465V): Transmitter Disabled
 Open: Transmitter Disabled
 - MOD-DEF 0,1,2 are the module definition pins. They should be pulled up with a 4.7 k~10 k Ω resistor on the host board. The pull-up voltage shall be V_{CC} or V_{CCR} .
 MOD-DEF 0 is grounded by the module to indicate that the module is present
 MOD-DEF 1 is the clock line of two wires serial interface for serial ID
 MOD-DEF 2 is the data line of two wires serial interface for serial ID
 - LOS is an open collector output, which should be pulled up with a 4.7 k~10 k Ω resistor on the host board to a voltage between 2.0 V and $V_{CC}+0.3V$. Logic 0 indicates normal operation; logic 1 indicates loss of signal. In the low state, the output will be pulled to less than 0.8 V.
 - These are the differential receiver output. They are internally AC-coupled 100 Ω differential lines which should be terminated with 100 Ω (differential) at the user SERDES.
 - These are the differential transmitter inputs. They are AC-coupled, differential lines with 100 Ω differential termination inside the module.
