CY2DP818-2

## 1:8 Clock Fanout Buffer

## Features

- Low-voltage operation  $V_{DD} = 3.3V$
- 1:8 fanout
- Single-input-configurable for LVDS, LVPECL, or LVTTL
- 8 pairs of LVPECL outputs with enable/disable
- Drives a 50-ohm load
- Low input capacitance
- Low output skew
- Low propagation delay Typical ( $t_{pd} < 4 ns$ )
- Industrial versions available
- Package available include: TSSOP
- Does not exceed Bellcore 802.3 standards
- Operation up to 350 MHz/700 Mbps

## Description

This Cypress series of network circuits is produced using advanced 0.35-micron CMOS technology, achieving the industry's fastest logic.

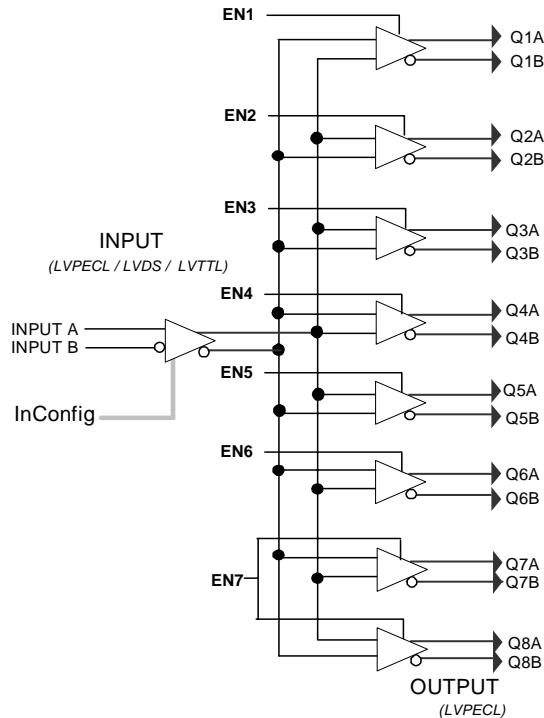

The Cypress CY2DP818-2 fanout buffer features a single LVDS or a single-ended LVTTL-compatible input and eight LVPECL output pairs.

Designed for data-communications clock-management applications, the large fanout from a single input reduces loading on the input clock.

The CY2DP818-2 is ideal for both level translations from single-ended to LVPECL and/or for the distribution of LVPECL-based clock signals.

The Cypress CY2DP818-2 has configurable input functions. The input is user-configurable via the Inconfig pin for single ended or differential input.
