RF310	Repeatable, RF, N.C. Bypass relay
RF313	Sensitive, repeatable, RF N.C. Bypass relay

INTERNAL CONSTRUCTION

PERFORMANCE FEATURES

The ultraminiature RF310 and RF313 relays are designed with an internal bypass (through path), when the coil is de-energized, to provide low insertion loss and VSWR through the bypass and simplicity of design for the user. Relays have improved RF insertion loss repeatability over the frequency range from dc to 3 GHz. Highly suitable for use in attenuator, linear amplifier and other RF circuits. The RF310 and RF313 feature:

- N.C. bypass configuration.
- Repeatable insertion loss.
- Broad bandwidth.
- Metal enclosure for EMI shielding.
- Ground pin option to improve case grounding.
- High isolation between control and signal paths.
- High resistance to ESD.
