# Surface Mount Plastic PIN Diodes

#### Features

- Industry Standard Surface Mount Packages
- Lead-Free (RoHS Compliant) Equivalents Available with 260 °C Reflow Compatibility
- Low Loss, High Isolation Switching Diodes
- Low Distortion Attenuator Diodes
- Single and Dual Diode Configurations
- Tape and Reel Packaging

#### **Description and Applications**

M/A-COM offers silicon PIN diodes in five standard, low cost, surface mount plastic packages for use as switches and attenuators. These diodes are offered with standard Sn/Pb plating, as well as with 100% matte Sn plating on our RoHS compliant devices. M/A-COM's PIN diodes feature a variety of I-region lengths resulting in lower resistance, and lower capacitance devices for various microwave control circuit applications.

The MA4P275/MA4P7436/MADP-007436 series offer the lowest series resistance for best performance as low loss series switches and high isolation shunt switches.

The MA4P789/ MA4P7433/MADP-007433 series have the lowest capacitance and offers the highest isolation in series and series-shunt switches through 3GHz.

The MA4P282/ MA4P7447/MADP-007155 series and the MA4P274/MA4P7455/ MADP-007455 series are general purpose PIN diodes useful as either switches or attenuators. Also Offering RoHS Compliant Equivalent Parts

SMPP Series V16

The MA4P277/MA4P7437/MADP-007437 series and MA4P278/MA4P7438/MADP-007438 series device have thicker intrinsic regions to provide lower distortion in attenuator circuits.

The MA4P290/MADP-007167 series devices have the thickest I-Region, offering the lowest distortion and highest IP3 for current controlled attenuator circuits. These devices are ideal for AGC functions for infrastructure and CATV applications.

These parts are available as single diodes, series tees (ST), series tee reverse (STR), common cathode pairs (CK), common anode pairs (CA), and unconnected pairs in the respective featured packages.

M/A-COM's PIN diodes are available in the SOT-23 (case style 287), the SOT-143 (case style 1068), the SOT-323/SC-70 (3L) (case style 1146), the SOD-323 (case style 1141), and the SC-79 (case style 1279) packages. These packages are supplied on tape and reel for automatic pick and place assembly. The tape and reel suffix designation is a "T" at the end of the part number.

1. The reverse current will not exceed 10  $\mu\text{A}$  at the reverse voltage rating.

2. Total capacitance is measured at 1 MHz at the indicated voltage.

3. Series resistance is measured at the specified current and a frequency of 100 MHz.

## Surface Mount **Plastic PIN Diodes**

#### **Mounting Information**

The illustration indicates the recommended mounting pad configuration for the SOT-23, SOT-323 , SOD-323, SOT-143, and SC-79 packages. Solder paste containing flux should be screened onto the pads to a thickness of 0.005-0.007 inches. The plastic package is placed in position, firmly adhering to the solder paste.

Permanent attachment is performed by a reflow soldering procedure during which the tab temperature does not exceed +275 °C and the body temperature does not exceed +250 °C, for standard models and +260 °C for the RoHS compliant devices.

#### Please refer to Application Note M538 for surface mounting instructions.
