

SMT Current Sensor – T6522-A

This low cost transformer is designed for use at 50 kHz to 300 kHz to sense continuous currents up to 3 Amps. The current windings can be connected in series to provide twice the output sensitivity. It is packaged in a small footprint, low profile, surface mount ceramic case that makes it ideal for pick and place operations.

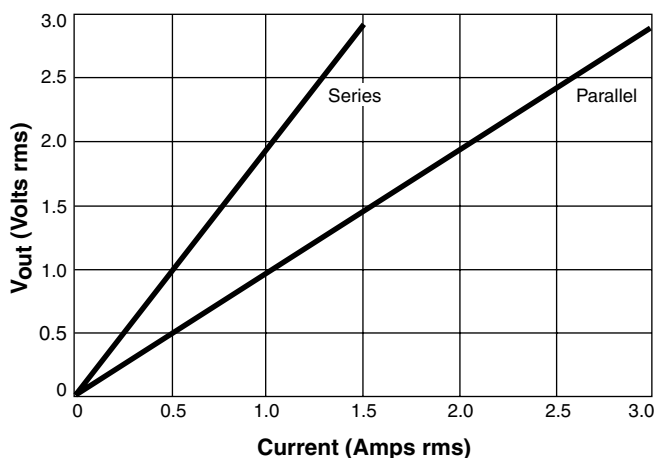

Applications include power supply feedback control, motor protection, overload sensing and detecting load drop or shutdown.

To request free evaluation samples, contact Coilcraft or visit www.coilcraft.com.

Part number	Turns ratio ¹	Sensed current I_{in} ¹ max	Inductance ² min (mH)	DCR max (Ohms)	Isolation Pri-sec (Vrms)
T6522-A	1:50	3 Arms	3.4	Pins 1,2 – 5,6: 0.006 Pins 3 – 4: 0.700	500

1. The two sensed current windings may be connected in parallel (1:50) to provide up to 3 A sensing capability, or connected in series (2:50) to provide twice the output sensitivity.
2. Inductance measured between pins 3 and 4 at 100 kHz, 0.1 Vrms.
3. Operating temperature range -40°C to +85°C.
4. Electrical specifications at 25°C.

Typical Response (with $R_T = 50$ Ohm)

Typical Application

Varying the terminating resistance (R_T) increases or decreases output voltage/Ampere in conductor.
